<http://buros.unl.edu/buros/jsp/search.jsp>

If full-text is not available, check the E-Journal Portal. Articles can be requested on the UC library website (use the Online Request Forms link) and mailed to our library via Interlibrary Loan.

A Note About Peer Review

Peer review refers to the policy of experts in the field examining journal articles before acceptance for publication. Peer review insures that the research described in a journal's articles is scientifically sound and of high quality. Sometimes the term "refereed" is used instead of peer reviewed.
